

The Price is Right – Convertible bonds offer cheapness globally

July 2018

Over the last few months convertible bonds have cheapened across most regions, offering investors a very compelling entry point to the asset class, which since the beginning of the year has enjoyed a strong fundamental backdrop and good year-to-date returns.

Why has cheapening occurred

A multitude of factors could bring the valuation of convertibles lower, however, it is usually a combination of circumstances that explain cheapening. In this current environment we believe the following three factors are the prevalent ones.

New issuance has been elevated

In periods of very active new issuance, as experienced year-to-date, existing convertibles may suffer as managers sell their positions to buy new convertibles. This is usually a short-term effect which is often reversed relatively quickly. We think this is the main cause for cheapening in developed market convertibles, particularly in Europe. Our process tends to be insulated somewhat from this cheapening effect as we are mindful of valuation mismatches. This has been a contributing factor to our underweight to the region.

Volatility has increased but convertibles have not participated as much

Recently market volatility has begun to pick up as geopolitical events continue to garner attention. As cheapness is very simply a comparison of the volatility in the market compared to the volatility priced in the convertible option, if market volatility goes higher, but the price of the convertible stays the same, then convertibles could be seen to be cheapening. Given that we think that the pick-up in volatility this year will be a permanent factor, we think that pricing of convertibles is attractive, and convertibles have not yet adjusted to the higher volatility level.

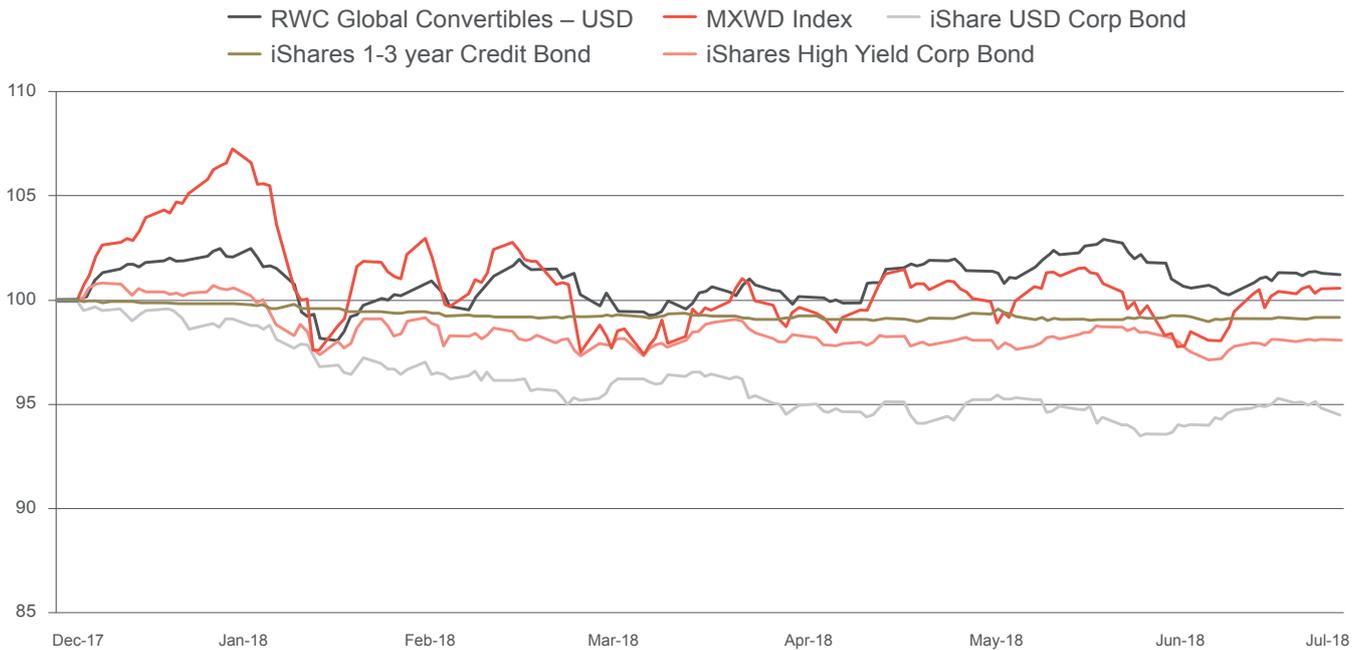

Selling pressure can reduce valuations

Investor selling pressure and redemptions can lead to lower valuations as supply pressures can bring down the price of convertibles. We don't think this has been a prominent factor in the current cheapening. Our flows remain positive year-to-date, and peer group analysis does not suggest significant outflows. However, investors in Europe have been pulling money from all funds (active and passive) to the tune of nearly EUR 40bn in June 2018--this is the highest rate of outflows over the past 5 years. These risk-off fund flows have not been overly challenging for convertibles, but may explain some market cheapening as well.

How have convertibles performed as valuations have moved lower

Although convertibles have cheapened, we note that performance has remained strong for the product and our funds. The snapshot below shows the year-to-date returns of the RWC Global Convertibles Fund versus a number of indices.

FIGURE 2

Past performance is not a guide to the future. The price of investments and the income from them may fall as well as rise and investors may not get back the full amount invested.

We can attribute the strong performance of convertible bonds to the strong fundamental backdrop that the asset class currently exhibits, as discussed in previous reports. Namely low duration, which allows convertibles to be among the best fixed income asset classes in rising rate environments. Convertible bonds have an exposure to volatility and convexity which allows them to participate well with rising equity markets and compound returns as equities fluctuate. The active new issuance calendar allows for diversification and alpha generation through participation in actively priced new deals.

The RWC Global Convertibles Fund has also performed well versus its index and peer group over this period: we have actively avoided the expensive European convertibles which have suffered thus far year-to-date, and have a process which works very well in periods of increased volatility.

Given the cheapening how is the asset class poised for the second half of the year

We are encouraged that convertible bonds have provided investors with a strong product to navigate the first part of the year, which has proved challenging for many asset classes. We think that the fundamental backdrop which has allowed for such strong returns is not transient and will continue for the foreseeable future. What is particularly exciting for the product is that this fundamental backdrop is now aligned with an attractive valuation entry point for new investors which has not overly penalised existing holders.

We believe that historically convertibles have experienced their best returns following periods of cheapening, as valuation gaps should not persist, especially if the reasons for cheapening are transitory, and that convertible bonds should eventually converge to a fair value. Combining a cheaply valued convertible asset class with a positive fundamental view is a compelling scenario.

**Davide Basile**

Davide is the Head of the Team and lead portfolio manager for the RWC Convertible Bond strategies. Davide joined RWC in January 2010 to lead the team and he brought with him a long history in convertible bonds having worked at Morgan Stanley since 2001.

At Morgan Stanley Davide worked with in both the Private Wealth and Investment Management divisions, and most recently held the Head of Convertible Bonds position. Davide graduated from Imperial College London with a degree in Material Science Engineering.

**Justin Craib-Cox, CFA**

Justin joined RWC Partners as a senior member of the Convertible Bond team and co-manager of the Core Plus Funds in March 2018. He brings extensive industry experience via Investment Management, Trading & Execution, Equity & Credit Research, and Corporate Development. Prior to joining RWC, Justin worked as Senior Fund Manager to the Global Convertible Bond Portfolio, with peak AUM of USD +2.5bn, at Aviva Investments. Justin was responsible for global allocation, security analysis and selection, trading and execution and generation of risk-adjusted returns. Prior to Aviva Investments, he was deputy fund manager/analyst for global convertible bonds at M&G Investments, working alongside the lead manager for a EUR +1bn portfolio.

Justin is a CFA Charterholder and graduated from the University of Virginia where he gained a degree in English and History. He earned a Masters in Finance from London Business School.

Unless otherwise stated, all opinions within this document are those of the RWC Convertible Bonds team, as at 31 July 2018.

The term "RWC" may include any one or more RWC branded entities including RWC Partners Limited and RWC Asset Management LLP, each of which is authorised and regulated by the UK Financial Conduct Authority and, in the case of RWC Asset Management LLP, the US Securities and Exchange Commission; RWC Asset Advisors (US) LLC, which is registered with the US Securities and Exchange Commission; and RWC Singapore (Pte) Limited, which is licensed as a Licensed Fund Management Company by the Monetary Authority of Singapore.

RWC may act as investment manager or adviser, or otherwise provide services, to more than one product pursuing a similar investment strategy or focus to the product detailed in this document. RWC seeks to minimise any conflicts of interest, and endeavours to act at all times in accordance with its legal and regulatory obligations as well as its own policies and codes of conduct.

This document is directed only at professional, institutional, wholesale or qualified investors. The services provided by RWC are available only to such persons. It is not intended for distribution to and should not be relied on by any person who would qualify as a retail or individual investor in any jurisdiction or for distribution to, or use by, any person or entity in any jurisdiction where such distribution or use would be contrary to local law or regulation.

This document has been prepared for general information purposes only and has not been delivered for registration in any jurisdiction nor has its content been reviewed or approved by any regulatory authority in any jurisdiction. The information contained herein does not constitute: (i) a binding legal agreement; (ii) legal, regulatory, tax, accounting or other advice; (iii) an offer, recommendation or solicitation to buy or sell shares in any fund, security, commodity, financial instrument or derivative linked to, or otherwise included in a portfolio managed or advised by RWC; or (iv) an offer to enter into any other transaction whatsoever (each a "Transaction"). No representations and/or warranties are made that the information contained herein is either up to date and/or accurate and is not intended to be used or relied upon by any counterparty, investor or any other third party.

RWC uses information from third party vendors, such as statistical and other data, that it believes to be reliable. However, the accuracy of this data, which may be used to calculate results or otherwise compile data that finds its way over time into RWC research data stored on its systems, is not guaranteed. If such information is not accurate, some of the conclusions reached or statements made may be adversely affected. RWC bears no responsibility for your investment research and/or investment decisions and you should consult your own lawyer, accountant, tax adviser or other professional adviser before entering into any Transaction. Any opinion expressed herein, which may be subjective in nature, may not be shared by all directors, officers, employees, or representatives of RWC and may be subject to change without notice. RWC is not liable for any decisions made or actions or inactions taken by you or others based on the contents of this document and neither RWC nor any of its directors, officers, employees, or representatives (including affiliates) accepts any liability whatsoever for any errors and/or omissions or for any direct, indirect, special, incidental, or consequential loss, damages, or expenses of any kind howsoever arising from the use of, or reliance on, any information contained herein.

Information contained in this document should not be viewed as indicative of future results. Past performance of any Transaction is not indicative of future results. The value of investments can go down as well as up. Certain assumptions and forward looking statements may have been made either for modelling purposes, to simplify the presentation and/or calculation of any projections or estimates contained herein and RWC does not represent that any such assumptions or statements will reflect actual future events or that all assumptions have been considered or stated. Forward-looking statements are inherently uncertain, and changing factors such as those affecting the markets generally, or those affecting particular industries or issuers, may cause results to differ from those discussed. Accordingly, there can be no assurance that estimated returns or projections will be realised or that actual returns or performance results will not materially differ from those estimated herein. Some of the information contained in this document may be aggregated data of Transactions executed by RWC that has been compiled so as not to identify the underlying Transactions of any particular customer.

The information transmitted is intended only for the person or entity to which it has been given and may contain confidential and/or privileged material. In accepting receipt of the information transmitted you agree that you and/or your affiliates, partners, directors, officers and employees, as applicable, will keep all information strictly confidential. Any review, retransmission, dissemination or other use of, or taking of any action in reliance upon, this information is prohibited. The information contained herein is confidential and is intended for the exclusive use of the intended recipient(s) to which this document has been provided. Any distribution or reproduction of this document is not authorised and is prohibited without the express written consent of RWC or any of its affiliates.

Changes in rates of exchange may cause the value of such investments to fluctuate. An investor may not be able to get back the amount invested and the loss on realisation may be very high and could result in a substantial or complete loss of the investment. In addition, an investor who realises their investment in a RWC-managed fund after a short period may not realise the amount originally invested as a result of charges made on the issue and/or redemption of such investment. The value of such interests for the purposes of purchases may differ from their value for the purpose of redemptions. No representations or warranties of any kind are intended or should be inferred with respect to the economic return from, or the tax consequences of, an investment in a RWC-managed fund. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns. Nothing in this document constitutes advice on the merits of buying or selling a particular investment. This document expresses no views as to the suitability or appropriateness of the fund or any other investments described herein to the individual circumstances of any recipient.

AIFMD and Distribution in the European Economic Area ("EEA")

The Alternative Fund Managers Directive (Directive 2011/61/EU) ("AIFMD") is a regulatory regime which came into full effect in the EEA on 22 July 2014. RWC Asset Management LLP is an Alternative Investment Fund Manager (an "AIFM") to certain funds managed by it (each an "AIF"). The AIFM is required to make available to investors certain prescribed information prior to their investment in an AIF. The majority of the prescribed information is contained in the latest Offering Document of the AIF. The remainder of the prescribed information is contained in the relevant AIF's annual report and accounts. All of the information is provided in accordance with the AIFMD.

In relation to each member state of the EEA (each a "Member State"), this document may only be distributed and shares in a RWC fund ("Shares") may only be offered and placed to the extent that (a) the relevant RWC fund is permitted to be marketed to professional investors in accordance with the AIFMD (as implemented into the local law/regulation of the relevant Member State); or (b) this document may otherwise be lawfully distributed and the Shares may lawfully be offered or placed in that Member State (including at the initiative of the investor).

Information Required for Distribution of Foreign Collective Investment Schemes to Qualified Investors in Switzerland

The representative and paying agent of the RWC-managed funds in Switzerland (the "Representative in Switzerland") is Société Générale, Paris, Zurich Branch, Talacker 50, P.O. Box 5070, CH-8021 Zurich. In respect of the units of the RWC-managed funds distributed in Switzerland, the place of performance and jurisdiction is at the registered office of the Representative in Switzerland.
